# **COMPUTER ORBIT MODELING**

|   |            |
|---|------------|
| <b>PREFACE</b>  | <b>7</b>   |
| <b>COMPUTER ORBIT MODEL</b>   | <b>12</b>  |
| <b>FORCE MODELS</b>   | <b>18</b>  |
| Gravitation of Voluminous Body .....                                | 19         |
| Gravitation of Material Point .....                                 | 22         |
| Radiative Force .....   | 23         |
| Reactive Force .....  | 25         |
| Braking Due to Atmosphere .....                                     | 26         |
| Relativistic Perturbations .....                                    | 27         |
| Effects of Forces .....   | 28         |
| <b>DIFFERENTIAL EQUATIONS OF ORBITS</b>                             | <b>31</b>  |
| Linear and Regular Equations .....                                  | 32         |
| Smoothed Equations .....  | 36         |
| Stabilized Equations .....  | 38         |
| Equations in Orbital Elements .....                                 | 50         |
| Encke's Equations .....   | 51         |
| Graventric Frames and Synchronous Tracking Equations .....          | 62         |
| Short-period Perturbation Problem and Averaged Equations .....      | 84         |
| Efficiency of Equations .....                                       | 93         |
| <b>INTEGRATION METHODS</b>  | <b>108</b> |
| Terminology .....   | 110        |
| Taylor Expansion Method .....                                       | 111        |
| Runge–Kutta Methods .....   | 114        |
| Extrapolation Methods .....   | 138        |
| Multistep Methods .....   | 144        |
| Geometric Methods .....   | 155        |
| Efficiency of Methods .....   | 169        |
| <b>ORBIT DETERMINATION</b>  | <b>177</b> |
| Inverse Problem of Orbital Dynamics .....                           | 177        |
| Model Representations of Observations .....                         | 179        |
| Isochronous Derivatives .....                                       | 181        |
| Methods for Solving Inverse Problems .....                          | 184        |
| Efficiency of Methods .....   | 192        |
| Problem of Ambiguous Orbit Determination .....                      | 197        |
| <b>METHODS FOR EVALUATING PARAMETRIC ACCURACY</b>                   | <b>218</b> |
| Least Square Problem, Its Geometry, and Confidence Estimation ..... | 219        |
| Simulation of Confidence Region .....                               | 223        |
| Simulation of Virtual Parameter Values .....                        | 225        |
| Indices of Nonlinearity .....                                       | 234        |
| Efficiency of Methods .....   | 236        |
| <b>APPENDIX</b>   | <b>253</b> |
| <b>REFERENCES</b>   | <b>263</b> |
| <b>INDEX</b>  | <b>275</b> |
